

SeaBridge

S U S T A I N A B I L I T Y

**Brand Guidelines**

# 01

## Concept

“SeaBridge consultancy is based on strong foundations that effectively combine sustainable strategies to create forward-thinking companies”.

The logo with an abstract style, symbolizes a bridge that represents strength, transitioning from the present to the future. Over a sea of possibilities, SeaBridge provides the foundations to achieve the desired business sustainability.

The logotype and symbol coexist in perfect harmony, yet each can be independently utilized in various media as needed, all while maintaining brand recognition.

## 02 Construction grid

Construction grid is based on square modules that allow for proportional scaling of the logo, ensuring consistent application without modifications or distortions.

Seabridge logo is built upon a horizontal grid with proportions of 22 to 4. The relationship between the horizontal and vertical units is expressed as "x," with a value of 1.

# 03

## Safety zone

The clear space refers to the area surrounding the logo that should remain free from any other elements to ensure proper visibility and maintain visual independence from accompanying graphic elements.

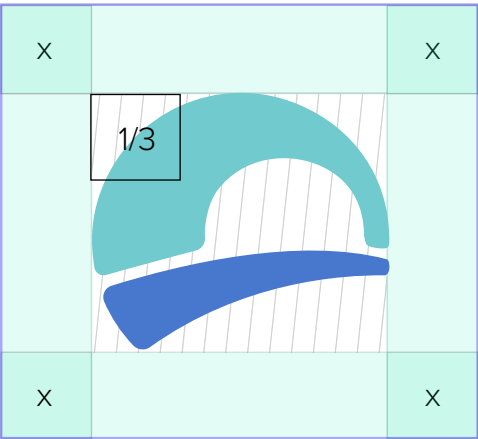

The clear space should be equivalent in size to the letter "e" contained within the Seabridge logo. This means that all elements, such as text or images, should be positioned outside of this clear space.

### Icon area

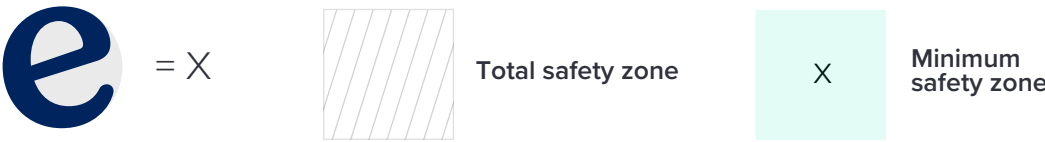

The proposed clear space for the icon is equivalent to one-third of its height.

02. Icon area

# 04

## Scaling

To ensure proper legibility of the logo, it is important to respect the minimum dimensions for its application, both in printed and digital formats.

|---------------------|------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| 01. Print version   | <br>2,5 cm  | <br>1 cm    |
| 02. Digital version | <br>86 px | <br>18 px |

# 05

## Versions

The logo should be implemented in its horizontal version at all times and aligned to the left. However, in cases where necessary, the icon or the logotype of Seabridge Sustainability can be used to represent the brand on various media.

It is recommended to use the icon only when the brand is well-established or more recognized.

## Variations

Options 1 and 2 will be the most common, depending on the background required, while options 3 and 4 in white are only to be used when applying the logo on a color that is part of the logo itself or on colors that compete with the brand's colors

The following variations may be used only if none of the previous options are suitable and if there are competing visual elements that hinder the proper visibility of the logo. These variations should be used sparingly and only when absolutely necessary.

- 5. Grayscale versions
- 6. Negative version
- 7. Positive version

# 07

## Colors

The corporate color palette consists of the following four colors. Most of the pieces should utilize a light blue background, while in other cases, a navy blue background may be used as needed.

The azure blue and aqua blue will always be the predominant colors in the pieces, with azure blue being more dominant than aqua blue, which serves as a complementary color.

All colors should be used at 100% opacity in all cases to ensure sufficient contrast and legibility

## Typography

To ensure brand integrity, the chosen typography will always be the Recoleta Font family, as it combines a simple appearance with elegant proportions. With its diverse styles and variations, it allows for the highlighting of titles and body text using just one typeface

Auxiliary typography for Power Point or DOCS:  
In cases where it is not possible to install and use the brand's typography for presentations or documents, Calibri may be used exclusively for such cases..

- 0.1 Primary typography
- 0.2 Auxiliary typography for Office documents.
